

SUMATERA
BRIQUETTE CHARCOAL

MORE THAN FIRE, IT'S A COMMITMENT

About us

Sumatera Briquette Charcoal was Born not just form a business idea, but from a purpose to create , impact, to uplift local communities, and to offer the world a cleaner, more responsible enery alternative.

We Started with humble roots, in a small village surrounded by coconut plantation and hardworking hands, every briquette we produce carries the story of these people-of resilience, of craftsmanship, of pride in tradition

When you Choose Sumatera Briquette Charcoal, you become part of a journey-a journey of empowering villages, protecting the enviroentment, and lightinghomes and gathering around the world.

coconut charcoal Briquette

Sourcing premium coconut shells and employing eco-friendly production processes. Our products are tailored to meet the specific requirements of markets like Iraq, ensuring satisfaction and long-term partnerships

USED FOR ?

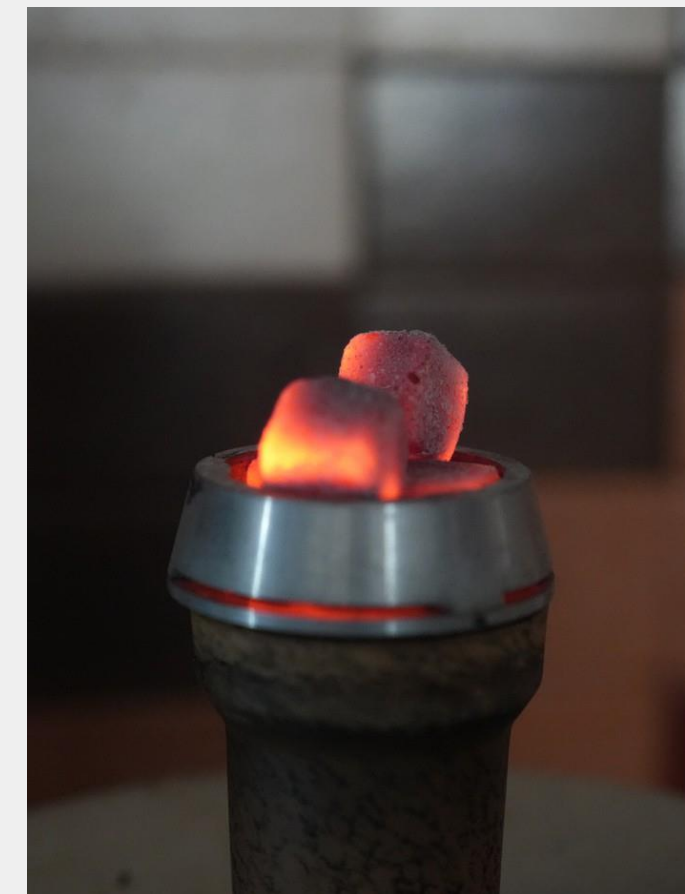

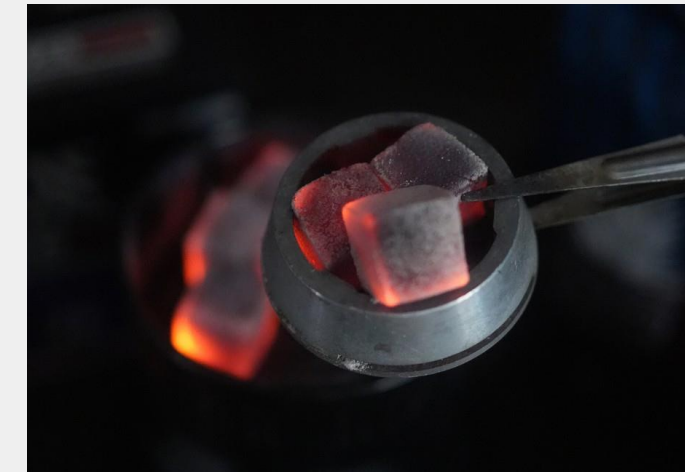

SHISHA CHARCOAL

Shisha charcoal briquette are made from coconut shells charcoal. it is kind of high-quality charcoal product specially designed and manufactured for hookah users. cubic shisha charcoal is non- flammable, which needs a gas stove to ignite. compared with the round shape shisha charcoal, the burning time of cubic hookah is longer.

BBQ CHARCOAL

While there may still be some argument about it, most people in the know agree the food grilled over charcoal tastes better than food grilled over gas. yes, gas grilling is quicker and more convenient, but when it's the weekend and you have all the time you need, charcoal is trullt the way to go.

Charcoal **Briquette**

Our briquette are made from coconut shell charcoal, hardwood and sawdust taht are burnt down the same way as lump charcoal. unlike lump charcoal, which is pure wood, additives are in the process of making briquettes.

the additives are mainly used to hold the materials together in order the achieve clean little blocks that are often roundish-squarish in shape which makes them easier to stack. they provide a more stable burn, maintaining a steady temperature for a longer period of time with less hand hilding then lump charcoal.
